Are you ready to join a passionate community of people who are changing how health care is delivered? A place where you will find a career you love while truly making a difference building healthier communities. If this sounds like you, we would love to have you apply as **Healthcare Data Analyst** with Medical Home Network (MHN)!

MHN is a not-for-profit collaborative that has fundamentally changed how care is delivered. Our proven model of care unites provider communities and diverse healthcare entities around a common goal: to redesign healthcare delivery and transform the way care is managed.

THE PERKS
- Fun, challenging, and collaborative work environment with passionate colleagues that care deeply about healthcare delivery.
- Recognized as One of the Best Places to Work in Healthcare by Modern Healthcare.
- Competitive benefits program including Medical, Vision, Dental, HSA, FSA, and 401k.
- Fitness reimbursement, commuter benefits, and tuition assistance.
- Great work life benefits- Paid time off, sick time, and 12 paid holidays.
- Hybrid schedule, 2 days on site 3 days remote.

THE OPPORTUNITY:
The Healthcare Data Analyst position involves writing queries, analysis of healthcare data, with an emphasis on working with the technical operation team to create requirements and support BI reporting capabilities.

The analyst will contribute to population health analyses, clinical workflows, report development, and product development.

WHAT YOU CAN LOOK FORWARD TO:
- Produce, analyze, and maintain reports to measure, track, and manage program measures
- Analyze inbound health care data including claims, ADT HL7, and eligibility and and assess quality and consistency
- Assist in designing, programming, testing, and standardizing processes and reports for auditing and verification of data source
- Create business requirements to support new client/product implementations
- Support product quality assurance
- Present analytic findings to multiple audiences
- Research and support adoption and utilization of emerging technologies for data analysis
- Implement analytic directives from senior staff

WHAT YOU'LL NEED TO SUCCEED:
- Bachelor's degree in data analytics, economics, statistics, public health, or a comparable program with a quantitative emphasis. Master's degree preferred.
- 1-3 years relevant industry experience
- Competency in data manipulation, analysis, and report presentation
- Working knowledge of healthcare data including medical claims, pharmacy claims, and eligibility
- Work or education experience with a focus on population or public health

- 1 + years professional or graduate level experience using statistical software
- Must be analytical, detail oriented, and a problem solver
- Strong desire to expand technical and industry skill sets
- Excellent Excel and database skills
- Experience with T-SQL, Python, and BI reporting tools a plus
- Team player both within and across teams
