

# Wetland Scientist

## Looking for the right place to expand and grow your Natural Resources talents?

Are you desiring an opportunity to advance and expand your career to lead environmental planning projects for a wide variety of federal, state, and local government clients? As we grow and strengthen our natural resources work, Prairie Engineers is adding a Wetland Scientist with a passion for Natural Resources to our team to lead our Waters of the U.S. delineation and other natural resources projects. You will have experience delineating wetlands and other regulated resources according to the US Army Corps of Engineers (USACE) Wetlands Delineation Manual and Regional Supplement. You should also have experience coordinating with a variety of clients and regulatory agencies, interacting with multi-discipline project teams, and writing reports and technical memorandums. If you have the desire to take on progressive responsibility and help mentor, lead, and grow an existing environmental science team, let's talk! We offer a flexible work schedule, work from home opportunities, and career growth plans to meet your individual needs while providing a competitive salary and benefits. We may accommodate this position as a full-time or part-time schedule, remotely or in any of our offices.

### What you will do:

**Lead Waters of the U.S. delineation** and other natural resources projects and personnel including mentorship of junior environmental staff

**Prepare and submit documents** compliant with Section 404 of the Clean Water Act

**Contribute to preparation of documents** compliant with National Environmental Policy Act (NEPA) and Principles, Requirements, and Guidelines (PR&G) for Water and Land Related Resources guidelines, including Categorical Exclusions (CE), Environmental Assessments (EA), Environmental Impact Statements (EIS)

**Occasional travel required** for fieldwork

### What we expect:

**Education:** Bachelor's degree in a relevant environmental discipline

**Experience:** 2+ years' experience in inland and/or coastal resource delineations; experience performing jurisdictional determinations and 404 permitting applications

**Knowledge, Skills and Abilities:** Strong attention to detail

**Safety:** Valid driver's license and insurable driving record

**Communication:** Excellent verbal and written communication skills

**Ideals:** Professional, positive attitude with a strong work ethic

**Teamwork:** Ability to work both independently and as part of a team

**Responsive:** Communicate openly, proactively, and promptly

### What you might add:

**More Education:** Master's degree in natural resources, botany or related biological field

**More Experience:** 6+ years' experience in Environmental Planning; experience with GIS programs, data sources, and resource impact analysis

**Additional Knowledge, Skills and Abilities:** Understanding of the applicable wetland related regulations and delineation protocols in multiple states; able to drive/navigate in remote locations
